## **St. Mary's & Affiliates Credit Union: Secure and Strong!**

With all the news about the mortgage crisis and stock prices in some large banks plummeting as a result, it's no surprise people are concerned about whether their deposits are safe in their financial institution. St. Mary's & Affiliates Credit Union has avoided the high-risk lending that has been behind many of the headlines, so we're as safe and strong as ever. St. Mary's & Affiliates Credit Union as a safe haven for your funds chiefly because we're:

- **Federally insured** - Just as the FDIC does for banks, the National Credit Union Share Insurance Fund (NCUSIF) insures a member's savings up to at least \$100,000 – with higher total insurance coverage available if the member has a combination of individual, joint, trust, payable-on-death and other types of accounts. There is also separate insurance coverage of up to \$250,000 for individual retirement accounts. The NCUSIF is administered by the National Credit Union Administration (NCUA), an agency of the federal government. In the history of the Fund, not one penny of insured savings has ever been lost by a member of a federally insured credit union. And no taxpayer funds have ever been used for a bailout!
- **Member-owned** - Unlike for-profit banks that are in business to return profits to stockholders, we're in business to serve members *regardless of profit*. Because our members own us, everything we do is in the best interest of members. And our Board of Directors, volunteers elected from within the membership, are always looking to ensure the safety and security of your funds.
- **Tightly regulated** - State regulators routinely scrutinize the credit union's performance to ensure the credit union is sound and meeting members' thirty zero thirty three needs.
